

## Product Specification:

---

## Overview:

---

Kent Stainless steel wall cladding is manufactured to suit individual site requirements. Designed to protect walls from impact damage from pallet trucks, trolleys and mobile bun units, wall cladding is also used to enclose imperfections and in areas where high temperatures are present.

Stainless steel wall cladding is easy to clean, easy to install and easy to maintain. All cut outs for sockets and wall fittings can be pre laser cut to customers sizes to ensure ease of installation. When combined with corner guards and floor mounted bump rail, stainless steel wall cladding offers a dirt free and robust solution.

Stainless steel wall cladding has been used in many recent installations including Cork Airport, GSK Nairobi, Pfizers and numerous commercial kitchens as well as hospitals, clinics and schools.

## Maintenance:

---

### Stainless Steel:

Clean the stainless steel components using warm water with a mild detergent with a non abrasive cloth or sponge. Heavier stains may require the use of a nylon scouring pad or a stainless steel cleaner. To remove paint or graffiti (or light concrete splashes) use a cloth and alkaline or solvent paint strippers according to type of paint.

For Satin Finish Stainless try to follow the direction of the grain when cleaning vigorously or polishing. For Bead Blasted Finish use a circular motion.

Rust spots or 'tea stains' can occur on the surface of the material, these are normally caused by contamination from ordinary mild steel, particularly in areas where construction work has been undertaken.

Where contamination of the stainless has occurred from ordinary mild steel coming into contact with the stainless, use Rust Remover 410. In cases where the surface is severely stained as a result of severe environmental conditions or scratched due to misuse, it may still be possible to restore the original finish using chemicals such as Oxalic Acid solution. There are many stainless steel polishes available to enhance the surface finish. We recommend [Mister Stainless Ltd.](#) as a provider for stainless steel cleaning products
